3M Science. Applied to Life.™

It's more than just products – It's knowing how to wear them that helps bring you home safely at the end of your workday.

This program is an intermediate level respiratory protection course. It is intended for individuals who have a basic knowledge of respiratory use and qualitative fit testing and who will be responsible for conducting qualitative fit testing within their workplace.

The webinar presentation includes an overview of respiratory personal protection, associated legislation and qualitative fit testing information, step-by-step video instructions and virtual demonstrations of a qualitative fit test.

Participants will have the option of following up with a trainer to conduct a qualitative fit test virtually to allow the trainer to provide feedback through virtual observation.

All participants receive an email afterwards with supporting documents such as a PDF of the workshop presentation, donning and doffing instructions, qualitative fit testing instructions and examples of fit testing documentation.

A Certificate of Attendance is provided upon completion of the workshop. A certificate of attendance will not be provided until a completed quiz is provided to the trainer.

Due to the virtual format of this course and not providing the hands-on practice portion, the participants are encouraged to contact their trainer to conduct a virtual fit test while the trainer is observing and providing feedback.

Note: Requirements for elements of this training pertaining to respiratory protection, at a minimum, conform to CSA Standard Z94.4 "Selection, Use, and Care of Respirators" in Canada and OSHA standard 1910.134 in the United States.

Course Length: Approx. 2 hours for Qualitative Fit Test Workshop (FTWS)

Required Equipment: **Must have 3M™ Respirators and fit testing equipment available.** To participate in the Webinar, an internet connection, computer and appropriate connection to call into the meeting is required.

Course fee: $250.00 CAD per attendee for Canadian citizens (taxes excl.) Attendance will be limited.
$200.00 USD per attendee for United States citizens (taxes excl.) Attendance will be limited.

Course Overview:

- What is a respiratory program?
- Legislative requirements
- Respiratory hazards
- Respiratory protection (negative and positive pressure)
- Fit testing – Why? Who needs it? How often? Qualitative vs. Quantitative Fit Testing
  - Teaching requirements for fit testers
- Demonstration of qualitative fit test using 3M FT-30 or FT-10 fit testing kits
